MICROSOFT BPOS

The Business Productivity Online Suite (BPOS) brings together online versions of our most trusted email and collaboration software in a single package.

An easy to use set of web-enabled tools that enable businesses of all sizes to access email, important documents, contacts and calendars from nearly any location.

Designed to help meet your needs for robust security, 24/7 reliability, and user productivity, these services can be up and running in minutes, helping businesses like yours, improve user productivity and reduce the cost and complexity of server management and maintenance.

Enterprise-Class Security & Reliability

BPOS delivers online versions of Microsoft's email and collaboration systems that businesses have been using for decades, all designed for the reliability, availability and performance needed by smaller organisations.

- Helps protect your email environment with always-up-to-date anti-virus and anti-spam solutions
- Helps safeguard your data with enterprise-grade reliability and disaster recovery, thanks to multiple geo-redundant datacentres and a strict privacy policy
- Guaranteed 99.9% uptime with money-back service level agreement.

IT Control & Efficiency

BPOS virtually eliminates the time and effort that IT people must spend managing your email and collaboration servers—while keeping you firmly in control.

- Patches, security updates and back-end upgrades are automatically deployed
- Web based access to system administration and user management
- Subscription service plan allows for more accurate forecasting of IT expenditures with predictable annual costs and no hardware or upgrade costs
- Purpose-built migration tools streamline getting started and user adoption
- 24/7 IT-level phone support.

User Familiarity & Productivity

BPOS works seamlessly with Microsoft Outlook and the other Office programs your employees already know, while providing them with access to email, calendars, and contacts from nearly any device.

- 25 GB of mailbox storage per user without driving up storage costs.
- Works with the devices use the most - PC, Mac, iPhone, Android, and Blackberry.
